DETAILED ACTION

Claims 1-16 are pending. Applicant's response to the restriction requirement submitted on October 31, 2007 is acknowledged. Applicant is advised that a new Examiner is examining the instant application.

Election/Restrictions

Applicant's election of Group I in the reply filed on 10/31/2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).¹

Claims 2-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/31/2007.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: (1) hexanes used to extract solanecol from tobacco dust;

¹ Applicant's response did not indicate whether the election was with traverse or without traverse, that it has been assumed that the election was made without traverse.

and (2) the hexane/sodium bisulfite solution utilized in the coupling reaction between 2,3-dimethoxy-5-methylhydroquinone and isodecaprenol to obtain ubiquinone (i.e. coenzyme Q10).

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,686,485. This is a double patenting rejection.

Other Matter

It is respectfully suggested that Applicant consistently refer to the compound made in the claimed method as either "coenzyme Q10" or ubiquinone in claim 1.

Conclusion

Art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. patent No. 6,506,915 (West)² discloses an alternative synthesis of coenzyme Q10 (i.e.

² West is not prior art.

ubiquinone) which is a total synthesis beginning with 2,3,4,5-tetramethoxy-6-geranyltoluene as the starting material.

Claim 1 is rejected. No claims are allowed. Claims 2-16 are withdrawn from consideration.
